

GRANITE PLANTS ON HALF TIME

Twin City Manufacturers Take Turns Saving Power till It Rains.

BARRE HAS A FIRE PATROL

Use of Hose Forbidden and Pumps Are at Work—Montpelier Reservoir Will Stand Drier of 12 Inches before Danger Point Is Reached.

Montpelier, Sept. 14.—Eight granite plants in this city were obliged to shut down today because of shortage of water and electricity to run motors. The power of the consolidated lighting company at Bolton Falls is practically exhausted and the steam plant in this city is unable to carry the entire load of power for electric railroad, street lighting and motors. The manufacturers in this city and Barre will take turns in shutting down for a day until rain comes, thus saving about 350 horsepower daily for the company.

The city supply of water from Berlin pond still holds out although the reservoir yesterday was 12 inches below normal and steadily falling. The supply can stand a drop of 12 or 14 more inches before the damages point is reached.

In Barre the use of hose has been forbidden, the pumps are at work and a fire and water patrol is constantly on duty.

QUESTION LIQUOR QUALITY.

Fifty Kinds from Three-Mile Bridge to be Analyzed.

Montpelier, Sept. 15.—Acting on complaints brought to its attention, the grand jury of Washington county, now in session, has summoned before it the license commissioners of Middlesex to ascertain what they know regarding the quality and purity of liquors sold at the second class saloon of T. B. Whalen near the three-mile bridge. As a result of that investigation, Sheriff Frank H. Tracy went yesterday to Whalen's place and secured samples of some 50 kinds of liquors sold there. SEVERE CASE OF PSORIASIS CURED

The Terrible Disease Spread Over Body and Limbs—One of Worst Cases Doctor Ever Saw—Itched Constantly—Defied Treatment.

USE OF CUTICURA MET WITH PERFECT SUCCESS

"I was cured of psoriasis through the use of the Cuticura Remedies. The terrible disease appeared on my arms and legs in small red spots under the skin, like blood blisters, the size of a pin-head, and it was constantly throwing off white scales, with a terrible itching. It spread until I was covered with it except my face and hands. I doctored with two of the best physicians I could find but they could not help me. One of them recommended one of the worst cases he ever saw. My mother gave me a bottle of Cuticura. I did not see much relief from the first bottle but she urged me to keep on taking it, also using Cuticura Soap and Cuticura Ointment. After a few weeks I saw some improvement, so I kept on using all three of the Cuticura Remedies until, about a year ago, I was entirely over it and have never had any more. I am sure that I am sure that the Cuticura Remedies cured me for I stopped other medicines after I began with Cuticura. We always use Cuticura Soap and Ointment in the house. James L. Manning, Box 204, Dunellen, N. J., Nov. 25 and 29, 1907."

ECZEMA TWO YEARS Speedily Cured by Cuticura

"For two years I suffered with eczema which broke out all over my body. It began with an itching and kept me awake at night. I tried everything that was recommended but without result until I was advised to try Cuticura Soap and Ointment. The first week I began to feel better, in two months the itching had stopped and before I had used half the Cuticura Remedies I was completely cured. I would not be without Cuticura if it cost five dollars. James A. Arrow, Brookfield, N. C., Oct. 6 and 21, 1907."

BOXING AND WRESTLING

Exhibition at Fort Ethan Allen by Pupils of Smith—One Man Counted Out.

A large and well pleased audience attended the exhibition given by the pupils in boxing and wrestling at Fort Ethan Allen this evening. Every effort was made by Mr. Smith and the officers of the post to make the program pass off pleasantly and their efforts were successful.

The first two numbers on the program were preliminary boxing matches of two rounds each. The first of these, between Private Daniel G. Troop and Roberts of H troop, was awarded to Roberts by Referee Con Reagan of St. Albans. The second bout was stopped because of the poor exhibition it promised to become.

In many ways the most interesting number on the list was the next, which was a wrestling match between Fletcher of the post and Hough of the Plattsburgh barracks. The bouts were to last seven minutes each and the match was decided on two falls out of three. The first fall was given by Fletcher after a lively struggle of two minutes. The next was won by Hough in even less time. The third bout, however, lasted until time was almost up when Fletcher again threw Hough. This was an exceptionally pretty bout as there was practically no difference in the weight of the men.

The main boxing match then took place, between Gunshannon of Plattsburgh and Fussion of the post. The match was to last four rounds but as there was practically no difference in the weight of the men, both men agreed to box another round, when the match was given to Fussion although the Plattsburgh man drew first blood and seemed to have the best of it until almost the end.

The last match of sixsmith pupils was between Hale of Plattsburgh and Chesire of the post. The match had hardly commenced when Chesire landed on Hale's jaw and laid him out. Hale took his count but was then unable to go on so that the match was given to Chesire in the first round.

After the exhibition, a match was arranged between "Blackie Braces" of St. Albans and "Kid" McFarland of Boston. The match lasted for four rounds, when it was declared a draw.

MEN FIGHT FOR WATER.

A Man Shot in Ohio in Struggle to Get the Last Glass.

Bellefontaine, Ohio, Sept. 14.—Fighting over the last drink of water left in camp, the fierce drought having dried up all the wells and springs in the vicinity, Frank Daddish was shot and killed at the Ohio Electric railway's construction camp today.

Daddish was married and wanted the water for his wife, who is living in the camp.

The police are seeking Mike Rulu and John Barica, who are charged with the shooting.

In the last two weeks it has become a serious proposition to supply the camp with water and the water tenders have had to tramp three miles to the Lewiston reservoir with pails. This morning only enough water for one drink was left in the camp. Rulu and Barica arrived at the pail just as Daddish was pouring the last of it into a cup to carry to his wife. The other men demanded that he divide the water. He refused and a fight followed.

It is charged that Rulu in front of Daddish and Barica in back of each drew a revolver and fired at the same time. He dropped to the ground and died in a short time.

Gas and Electric Portables

The fall styles are marvels of the metal worker's skill as well as splendid examples of the dual capacity so appreciated in light fixtures—graceful design and perfect utility.

The workmanship and finishes are a delight to those who appreciate real craftsmanship.

The same may be said of the season's oil lamp styles—the highest degree has been reached in beauty and efficiency. They are truly artistic.

Come in and see them.

All our invoices are all checked off. We don't expect to sell all the lamps, but everyone is welcome to our show-rooms to see what is going to be used this year.

TO DEVELOP NEW ENGLAND

Five Governors Held a Conference for the Purpose in Boston Monday.

MORE MEETINGS APPOINTED

The Governors Will Meet Again with in a Few Weeks to Make Definite Plans for a Larger Conference to Be Attended by Leading Officials and Citizens.

Boston, Mass., Sept. 14.—A conference of governors and other State officials of the New England States, together with prominent citizens for the purpose of formulating plans to develop the natural and business resources of New England was definitely projected at an informal gathering of the governors of five of the New England States held in this city today. There were present Governors Guild, Jr., of Massachusetts, Proctor, Vermont, Flood, New Hampshire, Higginson, Rhode Island and Woodruff, Connecticut.

Gov. Guild said that at the suggestion of a number of business, agricultural and other organizations of Massachusetts, he ventured to call a conference to consider the advisability of calling, after the presidential election a representative gathering from all of the New England States to consider the conservation of New England's resources, and the further development of this section of the country. He was opposed to any such organization as a national house of governors. He mentioned that the conference he had in mind might consider such matters as the preservation of the forests, the development of water ways and water powers, the preservation of shell fish, of public thoroughfares and better protection in the gathering and transportation of milk. After the subject had been thoroughly discussed, it was decided that a meeting should be held in Boston at some later date, attending by leading officials and citizens to take up the matter in detail. Another meeting of the governors alone, will be called within a few weeks by Governor Guild, to arrange more definite plans for the larger conference.

SENSATIONAL SUICIDE.

Unidentified Man Cut His Throat to Escape Vengeance of Enraged Mob.

Chicago, Sept. 14.—Two suicides, one startling in its accompaniments and the other the despairing act of a young woman hopeless of ever regaining her health, occurred in Chicago yesterday. Crouching in a dark cellar, at the door of which 100 men were clamoring, an unidentified fugitive almost severed his head from his body with a razor rather than face the vengeance of his pursuers. He had been tracked to the cellar after he had lurked a day five years old to the place. He had been dead an hour before it was learned that he had cut his throat.

The scene was the basement of the vacant building at No. 152 West Jackson boulevard. The man had been seen to pass into the place with Lawrence Brennan, whose home is at 12 West Van Buren street. Those who observed the two investigated. Threats from the boy's captor that he would shoot the first to enter held the pursuers off even after their number had reached a hundred.

The other suicide was that of Miss Florence Osborne, 35 years old, daughter of Eugene F. Osborne, prominent in the building of the world's fair as a consulting engineer. It occurred at her home, 1501 Jefferson avenue. Miss Osborne shot herself through the heart. Mr. Osborne believed that long suffering from an injury to her spine caused her to become despondent.

MAINE BARELY WENT REPUBLICAN

Plurality about 7,000 Compared with 26,816 in Last Presidential Year.

FIGHT ON LOCAL ISSUES

Reenactment of the Prohibitory Law and Taxation of Wild Lands Were Strong Points for Democrats—Four Republican Congressmen Elected.

Portland, Me., Sept. 14.—The republicans carried Maine today by something over 7,000 plurality as against 26,816 in the last presidential year, and 8,061 in 1904. At midnight returns from 48 out of 59 cities, towns and plantations in the State, gave for governor: Bert M. Fernald, republican, of Poland, 7,317, and Obadiah Gardner, democrat, of Rockland, 6,930.

In 1904, the same places gave 7,534 for Governor Cobb, republican, and 4,416 for Cyrus Davis of Waterville, democrat. The missing towns which are small, four years ago cast 1,568 republican votes and 79 democratic.

The republicans carried all four congressional districts by about the usual plurality. Amos L. Allen being re-elected in the first and E. C. Burleigh in the third, while John G. Sawyer was chosen to succeed Charles L. Littlefield in the second and Frank G. Quimby successor to the late Llewellyn Powers in the fourth district. The Legislature will be safely republican in both branches.

HEAVIEST VOTE SINCE 1888.

The vote was the heaviest since 1888, running well up to 140,000. The rains, however, were mainly by the democrats the party vote increasing more than 13,000 over that of 1904, while the republican vote fell off about 2,500.

The republican plurality is the smallest recorded in a presidential year in twenty-five years.

The two parties split even in the twenty cities, each capturing ten. The voting was particularly heavy in the rural districts, where the democrats largely through the popularity of Mr. Gardner, among the farmers, made great gains.

The results which were much closer than any of the republican leaders had anticipated showed not only the warmth of the contest, but the popularity of Mr. Gardner throughout the State in the cities as well as in the little rural districts where his patrons of industry
